HELP PEOPLE MAXIMIZE THEIR TIME

Setting priorities and managing time are basic to enhancing individual and organizational performance. The pressure to find innovative ways to achieve goals, stay ahead of the competition, respond quickly to customer needs, and enjoy life outside of work is increasingly intense in today's less structured, information-driven workplace. Meeting the daily challenges of managing professional and personal responsibilities requires a learning strategy that focuses on individual needs.

CREATE MORE TIME IN THE DAY

If you could reduce your staff's wasted time by just five minutes every hour, productivity would jump 8.3 percent. Efficiency levels would also rise as employees began to devote more time to completing critical tasks. The advantages of effective time management include:

- accomplishing more each day
- meeting project deadlines
- serving more customers without added staff, equipment, or office space
- spending more time pursuing opportunities and less time doing paperwork and attending meetings
